

P-LOCK

LOCKING POWER CABLES

STOP ACCIDENTAL DISCONNECTS

P-Locks are available in Black, Blue and Red to easily identify main and redundant power sources at a glance. Color coding with P-Locks adds peace-of-mind and ensures maximum uptime.

Lock down your data center power cords with the P-Lock from Total Cable Solutions. As more manufacturers are offering locking outlets, the P-Lock is quickly becoming the standard to prevent accidental disconnection of power cords from PDU outlets. P-Locks are designed with "P-shaped" clips on each side of the plug housing. These clips produce an audible "click" when inserted assuring a secure locking fit between the plug and the outlet.

FEATURES

- Male connector locks securely into locking PDU*
- UL Listed
- Ships coiled, never kinked
- Lifetime Warranty

SPECIFICATIONS

Easy pinch design allows quick release from outlets

P-Lock is the only locking cable compatible with new high density Server Technology HDOT™ PDU's

P-tabs ensure that P-Lock cables lock securely into Raritan® SecureLock™* and ServerTech lockable PDU's

C14 to C13

C14 to C15

C20 to C19

Feature

SUREFIT™
LOCKING SLEEVE
The SureFIT™ Locking Sleeve creates a strong connection and prevents power cables from being accidentally dislodged. Use SureFIT™ on the female end of your P-Lock Locking Power cable. Available for C13 and C19.

*all Raritan® iPDUs manufactured after June 2012 with part number prefix "PX2"

DID YOU KNOW?

• While P-Lock Locking Cables will work in ANY PDU, they are 100% compatible with Raritan® SecureLock™ locking PDU's as well as ServerTech® Lockable PDU's. Tests have shown that P-Locks will lock into other major brands' locking PDU's as well.

*Total Cable Solutions is not affiliated with Raritan® and SecureLock™ products or Server Technologies® and ServerTech™ products.
